5	This is a preliminary, explanatory section of this workplan, for 2023.							
	For 2023, even with available influenza and RSV vaccinations and effective COVID vaccinations which generally prevent severe illnesses, the following two task enhancements to mitigate respiratory illness from the COVID-pandemic years have been retained in the workflow:							
	1) SignUpGenius will be used to request the optimal number of volunteers, and will specify that masks are recommended for the inside tasks. 2) There will continue to be 8 separate inside workstations, rather than the 4 pre-COVID used in 2019 and previous years.							
	End of preliminary section of the workplan.
